

O&M Area Coordinator

Voltalia • Milano, Lombardia, Italia

At Voltalia we are passionate about renewable energies! We are an electricity producer from wind, solar, hydro, biomass and storage and also a service provider to 3rd party clients such as Development, EPC, O&M and Distribution. Today we are in 20 countries, split among 4 continents, and offering a global operating capacity to our clients. We are listed on the regulated Euronext market in Paris since July 2014.

Our O&M Department in Italy, is looking for an experienced O&M Area Coordinator with the following responsibilities:

- Carrying out Management and Maintenance activities of Solar PV systems spread throughout the country.
- Maintaining and nurturing relationships with current and potential clients
- Prospection of new development opportunities
- Managing the staff in the assigned geographical areas.
- Complying with KPI's contractually defined with customers and respective interfacing;
- Providing with analysis and solutions of technical issues occurring in Solar PV plants;
- Participating and leading the most complex maintenance activities for troubleshooting and diagnostic of failures, with the team of field technicians;
- Managing of guarantees with suppliers;
- Coordinating the day-to-day ordinary and extraordinary maintenance activities onsite.
- Verifying, executing and applying definitive changes agreed with the client.
- Complying with all company procedures and guidelines
- Interfacing Grid Operators and all local stakeholders involved in the implementation of O&M activities
- Coping with possible emergencies on the PV plants;
- Reviewing HSE and all relevant documentation of subcontractors;
- Inventory control to all the operational centres.
- Delivering regular feedback to the Clients on plants status and monthly report.
- Attending the internal regular meeting with headquarters

REQUIREMENTS

- Electrotechnical Engineering degree or equivalent;
- HSE training and/or knowledge;
- At least 5 years of experience in similar roles;
- Experience in maintenance processes;
- Medium Voltage and Power Electronics knowledge;
- Technical Design knowledge;
- Experience in photovoltaic solar energy area;
- Specific and special certification of the equipment's manufacturers is a nice-to-have (required to be recognized with the required technical skills to repair complex failures);
- Previous exposure to Business Development or Sales would be a plus;
- Microsoft Office knowledge.
- Local language fluency and English
- Availability to travel (50% of the time)

KEY SKILLS

- Self-motivated and mindful
- Customer-oriented
- Flexible and detail-oriented
- Coordination and leadership skills
- Comfortable in rapidly changing environments
- Used to work in a multinational environment
